

Galaxy HVA 510

WE BELIEVE IN **PRECISION**. WE BELIEVE IN **RELIABILITY**. WE BELIEVE IN **RESULTS**.

For applying heat activated engineered decorative laminates to aircraft interior panels

Features:

- Allen Bradley HMI/PLC controls
- Operator interface with color monitor
- PLC controlled sequence of operation with program storage
- Infrared heating system with 375 watt dura-lamp elements rated for 10,000 hours
- Single stage rotary vane vacuum pump with pressure gauge
- Pre-vacuum switch operated from the control panel
- Manual bleed valve to release vacuum
- Silicone membrane
- Working area: 60" W x 120" L x 20" H

Options

- Lower heating chamber for 2 sided laminations
- Heating elements are individually adjustable to match part contour
- Shuttle bed (not available with lower heat chamber)
- Data recorder
- Custom sizes available
